

CAESAR Icon is a powerful Business Intelligence Reporting tool that provides intuitive navigation through critical data elements of your business. Leverage data from various sources by turning them into a consolidated dashboard view of your operations so you can make faster, more effective decisions for your organization.

Performance Dashboards

CAESAR Icon aggregates your corporate data into visually compelling dashboard displays of what is happening within your business. Using straightforward navigation tools, you can quickly, easily, and in real time evaluate key performance indicators for your business.

CAESAR Icon pulls data from multiple databases to provide a summarized view of your business operations in easy to understand graphs and charts. Different dashboards can be created for various tiers within your organization, providing executives, managers and representatives the information they need to perform at optimal levels.

Business Analytics

CAESAR Icon's Business Analytics drills through complex data sets to get at the heart of the factors driving your organization. Large amounts of data can be turned into easy to understand metrics, displaying how various lines of business are performing, by region, timeframe, product or representative. CAESAR Icon turns data into intelligence to help you strategize how to successfully move your company forward.

- **Monitor Key Performance Indicators**
- **Deepen Organizational Knowledge**
- **Empower Users & Increase Motivation**
- **Communicate Strategy**
- **Reduce Costs & Redundancies**
- **Deliver Actionable Information**

Architecture

Designed for enterprise-level deployment, CAESAR Icon addresses critical business security concerns with user authentication, access control, data-level security, application firewalls and encryption.

CAESAR Icon centralizes varying sources of information via Service-Oriented Architecture (SOA), and reports can draw upon all modern protocols including Java, XML, SOAP, HTTP and .Net.

Implementation Process

Financial Database Services provides comprehensive implementation services. We will work with you to create key performance metrics for your organization and define where your raw data resides. FDS will design dashboard displays to communicate your corporate strategy to various tiers in your organizational hierarchy. Once implemented, FDS provides ongoing support and services through our Facilities Management, Disaster Recovery, and Business Consulting Services.

CAESAR Icon delivers intelligent data to all tiers of your business so you can execute your corporate strategies.

Financial Database Services offers CAESAR Icon as a Point Solution that can be integrated into your current technology infrastructure. CAESAR Icon can also supplement the CAESAR Integrated Solution, reporting on data from your CAESAR back office, as well as other databases within your organization. Financial Database Services will host the CAESAR Icon solution for you, providing you substantial economies of scale.
